B.R.I.D.G.E. is for Professors & Grad Students too!

May 2021 Update

B.R.I.D.G.E. to Teach Pharmacoepi/HEOR Students

Remembering Dr. Judith Jones on her 80th birthday, a life dedicated to drug safety and education in the pharmacoepidemiology and RWD fields. She used **B.R.I.D.G.E. as a classroom aid** in better equipping students as they enter the research arena. Continuing her legacy, we want educators to use B.R.I.D.G.E. as a teaching tool to explain how it can be a valuable resource to identify databases (DB), learn DB types, understand regional differences in data sets and their various coding systems. **Interested? Contact us** for an easy-to-follow outline of sharing B.R.I.D.G.E. to propel database education for your students.

Share our [brochure](#) when colleagues ask to know more about B.R.I.D.G.E.

B.R.I.D.G.E. for Graduate Students

To further enhance the educational experience with B.R.I.D.G.E., we are launching a **Student Program**. Graduate students actively engaged in research projects can [contact us](#) and gain a **one-time limited FREE access to B.R.I.D.G.E.**

We would love to feature your research on our website!

With almost 350 database profiles from 43 countries, DGI is a leader in curating healthcare database profiles

Welcome our New DGI President

Effective May 2021, Sharmila Kamani has been named the new President of DGI, LLC. Although Sharmila is taking on a new role, she is not a new face to our community having played a vital role in launching B.R.I.D.G.E. and managing the company (DGI) since 2009. She was also involved with prior versions of B.R.I.D.G.E. including [RA-DAR](#) starting 1992. Her goal is not to fill Dr. Jones's shoes; rather it is to help continue Dr. Jones's legacy by keeping B.R.I.D.G.E. alive and transform her dreams into reality.

Need assistance with database-related projects?

We can help you with your studies:

- Conduct comprehensive database searches;
- Identify data sources to meet your study criteria;
- Communicate with data vendors;
- Facilitate data access; and
- Develop your own customized searchable database repository.
