Tribute to our founder Dr. Judith K. Jones at ICPE, Copenhagen, 2022

Dr. William Rogers, husband of the late Dr. Judith K. Jones, honored her at the 38th International Conference of Pharmacoepidemiology (ICPE) and made a presentation to showcase her life and accomplishments. Dr. Jones left behind a donation that was made to the International Society of Pharmacoepidemiology (ISPE) so that the society may annually award up to two ISPE members making a demonstrable impact on public health through their work in pharmacoepidemiology. The first winners of these awards were announced at the 38th ICPE in Copenhagen on August 26, 2022.
